The authors regrets that the original published version of this article contained errors.

The mistake in Abstract and Table 1, the prevalence of VOPF in RA patients is mistakenly written as 20.2%. The correct results should read as follows: Of 865 RA patients, the prevalence of OP and VOPF was 33.6% and 19.2%, respectively.

The correct numbers of RA patients with or without VOPF in the Table 3 are as follows: The number of RA patients with VOPF is 166, and the number of RA patients without VOPF is 699.
