Correction to: Clin Auton Res

<https://doi.org/10.1007/s10286-012-0166-6>

There is a typographical error in the formula presented for QTVI. While the formula was correctly applied to the data presented, the description of the formula has an incorrectly placed parenthesis. It should read:

$$QTVI = \log_{10} \frac{(QT_v/QT_m^2)}{(RR_v/RR_m^2)}$$

There is also a typographical error in the units for the quantification of the noise levels in the isoelectric T–P sections of the ECG noted in the Discussion. They should read mV², not ms².

The original article can be found online at <https://doi.org/10.1007/s10286-012-0166-6>.
