It is my pleasure to announce the winners of the *Primates* 2020 Social Impact Award. These high social impact papers have been selected by me, Editor-in-Chief of *Primates*, and the two Vice Editors-in-Chief, James R. Anderson and Satoshi Hirata, based on data sources such as the Altmetric score (calculated from the number of mentions in the media and on social-networking sites) and on the number of full-text downloads.

The *Primates* 2020 Social Impact Award goes to the following three papers (in alphabetical order of the first author):

Shifra Z. Goldenberg, George Wittemyer (2020) Elephant behavior toward the dead: a review and insights from field observations. (*Primates* 61:119–128, 2020).

Zoë Goldsborough, Edwin J. C. van Leeuwen, Kayla W. T. Kolff, Frans B. M. de Waal, Christine E. Webb (2020) Do chimpanzees (*Pan troglodytes*) console a bereaved mother? (*Primates* 61:93–102, 2020).

Louise R. Peckre, Charlotte Defolie, Peter M. Kappeler, Claudia Fichtel (2018). Potential self-medication using millipede secretions in red-fronted lemurs: combining anointment and ingestion for a joint action against gastrointestinal parasites? (*Primates* 59:483–494, 2018).

These three papers received a great deal of media attention, were frequently mentioned on social networking sites, and were downloaded numerous times. The work of their authors thus contributed greatly to enhancing the reputation of our journal.

Please join us in congratulating them!

Tetsuro Matsuzawa, Editor-in-Chief, *Primates*
