It is my pleasure to announce the winners of the *Primates* 2021 Social Impact Award. These high social impact papers are selected by the editor-in-chief and the two vice editors-in-chief based on data sources such as the Altmetric score (mentions in digital media and on social networking sites) and the number of full-text downloads.

The *Primates* 2021 Social Impact Award goes to the following two papers (in alphabetical order of the first author):

Adriana E. Lowe, Catherine Hobaiter, Caroline Asiimwe, Klaus Zuberbühler, Nicholas E. Newton-Fisher. Intra-community infanticide in wild, eastern chimpanzees: a 24-year review (*Primates* 61:69–82, [2020](#));

William C. McGrew. Apes in fiction: does the content of novels reflect primatological knowledge? (*Primates* 62:321–330, [2021](#)).

Both of these papers received a great deal of media attention, were frequently mentioned on social networking sites, and were downloaded numerous times. The research reported in these two papers thus contributed greatly to enhancing the reputation of our journal.

Please join us in congratulating the authors!

Masayuki Nakamichi, Editor-in-Chief, *Primates*

Adriana E. Lowe, Catherine Hobaiter, Caroline Asiimwe,
Klaus Zuberbühler, Nicholas E. Newton-Fisher

William C. McGrew
