After the authors reviewed the article, corrections and details to avoid errors were added, which resulted in the following changes to the publication:

1. Error:

The 10 µl reactions contained 2.5 µl DNA extract, 0.5 µg BSA, 5 µl 2xKAPA2G (KAPA Biosystems, Wilmington, MA, USA), 1 µl PCR-grade water and 1 µl primer mix in their respective concentrations (Table 1).

This should be changed to:

2. Error:

All PCR products were analysed using the QIAxcel capillary electrophoresis system (Qiagen) as described in Wallinger et al. (2015), with the exception that the method AM3201 was used.

This should be changed to:

Wallinger et al. (2015), with the exception that the method AM320 with an injection time of 30 s was used.

In addition, there are two errors in Table 1:
