Unfortunately there was a technical problem with the conversion of the formulas in the PDF file of this article. The hyphen between chlorophyll-a and chlorophyll-b, as well as between pheophytin-a and pheophytin-b was not inserted in the following formulas:

$$\text{Chlorophyll-a } (\mu\text{g/ml}) = 12.25A_{663.6} - 2.55A_{646.6}$$

$$\text{Chlorophyll-b } (\mu\text{g/ml}) = 20.31A_{646.6} - 4.91A_{663.6}$$

$$\text{Total chlorophyll } (\mu\text{g/ml}) = 17.76A_{646.6} + 7.34A_{663.6}$$

$$\text{Carotenoids } (\mu\text{g/ml}) = 4.69A_{440.5} - 0.267\text{Chl-a} + \text{Chl-b}$$

$$\text{Protoporphyrin (nmol)} = 196.25A_{575} - 46.6A_{590} - 58.68A_{628}$$
$$\text{Magnesium Protoporphyrin (nmol)}$$

$$= 61.81A_{590} - 23.77A_{575} - 3.55A_{628}$$

$$\text{Protochlorophyllide (nmol)} = 42.59A_{628} - 34.22A_{575}$$
$$- 7.25A_{590}$$

$$\text{Chlorophyllide-a (mmol)} = A_{667}/74.9$$

$$\text{Chlorophyllide-b (mmol)} = A_{650}/47.2$$

$$\text{Polar Carotenoid } (\mu\text{g/ml}) = 4.69A_{440.5} - 0.267\text{TChl}$$

$$\text{Pheophytin-a } (\mu\text{g/ml}) = 22.42A_{665.4} - 6.81A_{653.4}$$

$$\text{Pheophytin-b } (\mu\text{g/ml}) = 40.17A_{653.4} - 18.58A_{665.4}$$

$$\text{Non polar Carotenoids } (\mu\text{g/ml}) = \frac{1000A_{470} - 4.78A_{653.4}}{164}$$

The original article has been corrected.
