Erratum to:

Gesunde Pflanzen 2023

<https://doi.org/10.1007/s10343-023-00828-1>

In Table 2 of this article, the legend was incorrectly given as “Data are presented as treatments mean \pm SE ($n=3$). Mean values within a column followed by different letters are statistically significant at $p \leq 0.05$ by Duncan’s multiple range test.”, but should have been “Data are presented as treatments mean \pm SE ($n=3$). Mean values within a row followed by different letters are statistically significant at $p \leq 0.05$ by Duncan’s multiple range test.”

The original article has been corrected.

Adnan Khan is a Research Scholar (Ph. D student) at the Department of Botany, A.M.U. Aligarh, India. His main area of research is to assess or evaluate the effects of certain abiotic stresses like salinity, heavy metal stress or combinations of them on the growth, yield and metal accumulation potential of medicinal plants.
