Correction to: The Vaiont landslide: re-assessment of the evidence leads to rejection of the consensus

Correction to: Landslides

<https://doi.org/10.1007/s10346-018-0996-y>

The published version of this article, unfortunately, contained error. Figure 10 correction was not carried out. The dark red label 'Key periods of acceleration' refers to short dark red lines horizontally across the figure. The dark red lines are in the wrong positions - they are all too far to the left but by differing amounts. They can be lined up sufficiently accurately by reference to the rainfall peaks but their positions must be exactly as shown in the original supplied excel figure. Given in this article is the correct figure.

The original article has been corrected.
