Correction to: Geologic controls of slow-moving landslides near the US West Coast

Correction to: Landslides

<https://doi.org/10.1007/s10346-021-01732-3>

The authors regret that they need to make some corrections in their original article.

The corrections are listed below:

- (1) The family name of a co-author was spelled incorrectly. Please change “Kelli Baxtrom” to “Kelli Baxstrom”. The “s” was missing.
- (2) One of the funding numbers was wrong. The correct fundings with funding numbers: This study was funded by NASA Interdisciplinary Research (IDS) in Earth Science Program (80NSSC17K0022), NASA Earth Surface and Interior Focus Area (80NSSC19K1317), NASA Science Team (80NSSC19K1491), and the USGS Landslide Hazards Program.
- (3) Three minor corrections in the main body of the paper.
 - “operator that drops whole phase cycles (2π)” below Eq. (1). Correction: the symbol “ π ” looks not correct.
 - “SAR interferograms using the minimum cost flow approach (Costantini 1998) using the GAMMA software”. Correction: please change the first “using” to “through”.
 - “We processed 6589 scenes of ascending ALOS PALSAR (Advanced Land Observation Satellite–Phased Array type L-band Synthetic Aperture Radar)”. Correction: please delete the spelled-out name of ALOS PALSAR, which has been introduced in the “SAR interferogram generation and unwrapping” section earlier.

The original article has been corrected.
