CORRECTION

Correction to: Inner retinal structure and visual function after idiopathic epiretinal membrane surgery with and without brilliant blue G

Correction to: Japanese Journal of Ophthalmology
<https://doi.org/10.1007/s10384-021-00851-7>

In the Original publication, Table 4 has been published incorrectly, due to error occurred in Copy Editing. The correct version of Table 4 is given in this Correction.

Table 4 The ganglion cell complex thickness to total retinal thickness ratios in the non-dye group and brilliant blue G group

G/T ratio (%)		1 month		3 months		6 months		12 months		P value
		Mean	SD	Mean	SD	Mean	SD	Mean	SD	
Average	Non-dye group	28.16	3.56	26.95	3.27	26.94	3.32	26.85	2.87	0.073
	BBG group	29.45	3.04	28.25	3.12	28.05	3.15	27.74	3.10	
Superior	Non-dye group	30.00	4.17	28.99	4.03	29.29	3.73	28.83	3.89	0.010
	BBG group	32.08	4.74	30.76	4.47	30.47	4.84	30.79	4.41	
Inferior	Non-dye group	29.98	4.71	29.21	4.79	28.55	4.86	29.41	4.27	0.616
	BBG group	31.93	4.05	30.87	4.22	30.55	3.95	29.89	3.84	
Nasal	Non-dye group	27.14	4.88	25.51	3.96	25.43	4.03	25.00	3.40	0.163
	BBG group	28.33	4.84	26.62	4.38	26.32	4.74	25.80	4.13	
Temporal	Non-dye group	25.52	4.07	24.10	4.13	24.50	3.78	24.19	3.76	0.233
	BBG group	25.48	3.30	24.76	3.98	24.86	4.01	24.46	4.45	

The differences in the G/T ratio between groups at 12 months were analyzed using the Mann-Whitney U test

SD standard deviation, BBG Brilliant blue G, G/T ratio ganglion cell complex thickness to total retinal thickness ratio

Original article has been corrected.
