Gallbladder varices

J Med Ultrasonics (2006) 33:187–188

The following figures should have been printed in color but by mistake appeared in black and white. The publisher regrets the error.

Fig. 1. **a** Ultrasound image of the main portal vein, which was filled with portal thrombi with heterogeneous echogenicities. *Arrow* thrombosed portal vein. **b** Color Doppler ultrasound image of the main portal

vein (same scanning plane as the image in Fig. 1a) confirming CTPV (*arrow*) and the absence of blood flow in the main portal vein and superior mesenteric vein (not shown in this image)

Fig. 2. **a** Ultrasound image of the gallbladder, showing a markedly thickened wall (*arrows*). **b** Color Doppler ultrasound image of the gallbladder (same scanning plane as the image in **a**) confirming the presence of gallbladder varices (*arrow*)
