Correction to:

Annals of Biomedical Engineering, Vol. 46, No. 3, pp. 488–497

<https://doi.org/10.1007/s10439-017-1972-8>

This erratum is to correct the results section on page 490.

There was an average age difference between groups (25.03 ± 2.79 years in the control group vs. 30.21 ± 13.76 years in the LBP group; $t = -2.32$, $p = 0.02$). The body mass index (BMI) was compared between groups, and there was no statistical difference ($23.79 \pm$

4.98 in the control group vs. 24.93 ± 5.27 in the LBP group; $t = -0.91$, $p = 0.36$). In the LBP group, the level of pain based on the visual analog scale (VAS) was 16.90 ± 6.66 mm; and their level of disability based on the Oswestry Disability Index (ODI) was $13.69 \pm 10.76\%$, which indicated a minimal disability level.
