

ERRATUM

In the article *Protein Folding and Evolution are driven by the Maxwell Demon activity of the Proteins* by A. Balbín and E. Andrade in *Acta Biotheoretica* 52, pp. 173–200, part of the text on p. 190 is missing. The text beginning with “At this late stage...”, should read:

At this late stage, records are approaching their minimum size because m , the number of measurements and digitalizations needed to obtain the minimal programs, is very large and therefore from equation (24), $\delta S \rightarrow [r_{seq}^*] - \{[r_{(seq:str)}^*] + [r_{(str/seq)}^*]\}$.
