CORRECTION

Correction to: Macroinvertebrates at the source: flow duration and seasonality drive biodiversity and trait composition in rheocrene springs of the Western Allegheny Plateau, USA

Table 2. Select physical variables among the 14 streams with Mann-Whitney (MW) *U*-test *p*-values between perennial (P) and intermittent (I) flow classes. Specific conductance, pH, and dissolved oxygen (DO) saturation reported as means and standard deviations (SD; in parentheses). Medians and SD of variables for each flow class also provided (italics). Sites are sorted by decreasing total flow duration

Site	Flow	Aspect	Area (ha)	Elevation (m)	Local channel slope (%)	Mean valley slope (%)	Relief ratio	BFW (m)	% Fines (<4 mm)	D ₅₀ (mm)	%>256 (mm)	Sp. cond. (µS/cm)	pH (S.U.)	DO (% Sat)
