Takao Kasuga and Zhiliang Fan were listed as co-authors without their acknowledgement and would like to be removed from the author's list.

This article is retracted on request of Weihua Wu due to inconsistent errors of intracellular and total beta-glucosidase activities assay and the mycelia

weight measurement in this paper. These errors lead to inaccurate results of total and intracellular beta-glucosidase activities, and the normalized endoglucanases and exoglucanases activities and therefore compromise the partial conclusions of this publication.
