The following Acknowledgments should be noted for the article.

**Acknowledgements** First, we would like to thank the National Institute of Public Health and the Environment (RIVM) for partly funding this study. Second, we would like to thank Dr. Fraukje Mevissen for her support with the ethical approval application and the study in general. Third, we would also like to thank the staff of the STI clinic South Limburg, in particular Chantal Weijzen and Mandy Sanders, for their advice in setting up the study. We would also like to thank Monique Steenland for her efforts in participant recruitment and conducting the interviews. Last, we would like to thank the participants for participating in this study and being so open in their interviews.
