The data given for the properties of the isolated crystals of the monamineoxidase type C dehydratase

were incorrectly stated in the Abstract and also in the text and in the legend to Figure 3. The values for the crystal of MaoC should now read that it diffracts to 1.93 Å with unit-cell parameters of $a = 81.458 \text{ \AA}$, $b = 82.614 \text{ \AA}$, $c = 124.228 \text{ \AA}$, $\alpha = \beta = \gamma = 90^\circ$.
