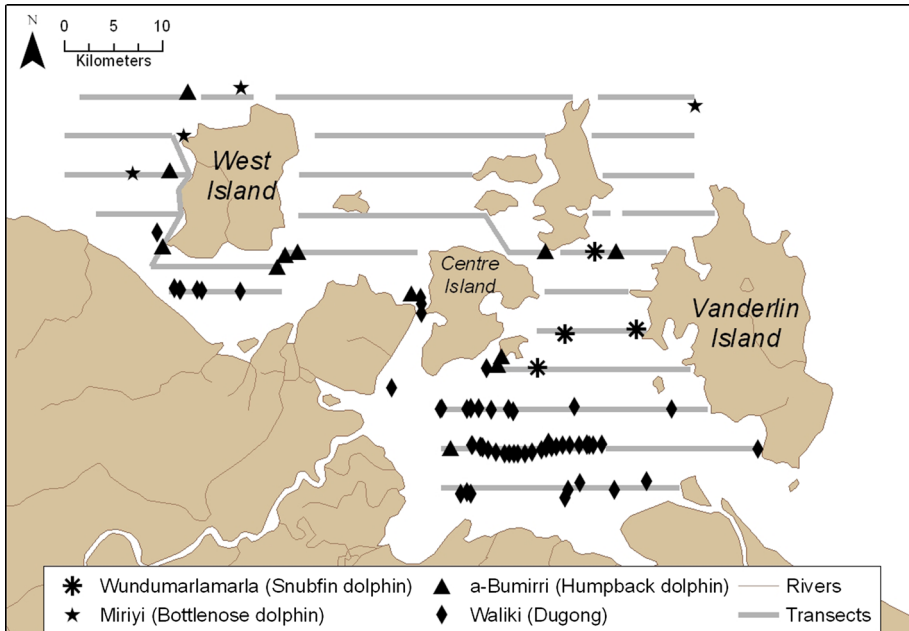

Fig. 5 Location of sightings of dolphin and dugong groups made by the li-Anthawirriyarra Sea Rangers and research scientists during the three vessel surveys in November 2009 and 2011 and May 2011. The planned transects are presented here rather than the actual GPS tracks because the tracks of the vessel movements, when the survey effort suspended, complicated the picture. The correspondence between the planned transects and the GPS tracks was excellent
