In the original publication, in the Methods section at the end of the section Gas Exchange Measurements,

the following information was missing: “For methane, we dropped one to two data points, as appropriate, to improve the r^2 of the regression of methane concentration versus time to ≥ 0.85 . These changes did not affect the findings of the paper.”

The original article can be found online at <https://doi.org/10.1007/s10533-018-0436-z>.
