QLQ-C ^b	58.75	79.43	-1.54	0.45	59.99	44.44	1.06	-0.33

Notes: C = Chemotherapy group; C_C = Control group matched to the C group; R = Radiotherapy group; R_C = Control group matched to the R group; CFT = Complex Figure Test; RAVLT = Rey Auditory Verbal Learning Test; TMT = Trail Making Test; SDMT = Symbol Digit Modalities Test; DS = Digit Span; VMS = Visual Memory Span; VFT = Verbal Fluency Test; CFQ = Cognitive Failures Questionnaire; QLQ-C = Cognitive subscale of the EORTC Quality of Life Questionnaire

^a A higher score on the TMT A and B indicates a poorer performance at this test

^b A higher score on the CFQ and QLQ-C indicates a poorer self-reported cognitive functioning

^c A positive score indicates a better cognitive functioning in breast cancer patients as compared to their healthy controls

* $P < 0.10$, ** $P < 0.05$, *** $P < 0.01$
