### Erratum to: Catal Lett (2017) 147:391–399 DOI 10.1007/s10562-016-1961-9

The original version of the article, unfortunately, contains an error in subsection 2.4 Catalytic Screening. This is a typo error that does not interfere with the results and conclusions obtained. The value of the integral corresponding to the chemical shift at 2.7 ppm ( $I_{2.7\text{ppm}}$ ) which is reported twice in this section should in fact be corrected to show the chemical shift of 3.7 ppm ( $I_{3.7\text{ppm}}$ ).
