Correction to: *Clinical Child and Family Psychology Review*
<https://doi.org/10.1007/s10567-020-00322-4>

The original version of the article requires a correction to one of the sentences. Under the section 'Limitations', the last sentence 'Findings of no support for mediation was also deemed important as, for example, our findings suggest..' should read as below.

Also important were where we found no support for moderation of the mediation model; for example, our findings suggest that parenting as a mediator of associations between depression and child functioning is concerning regardless of

the ages of the children, for both sons and daughters, and for a broad range of aspects of children's functioning.
