Correction to:

Celestial Mechanics and Dynamical Astronomy (2006) 94:351–367
<https://doi.org/10.1007/s10569-006-0001-2>

The relation for p_A in Eq. 39 of Capitaine et al. (2003) shows that the coefficient of fifth-order term for the general precession in longitude, p_A , is -3.83×10^{-8} . However, Table 1 of Hilton et al. (2006) gives this coefficient as $+3.83 \times 10^{-8}$. The sign in Capitaine et al. (2003) is correct. At this epoch, J2020.5, the accumulated error amounts to approximately $+2.77 \times 10^{-11}$ arcsec and is increasing at about 6.8×10^{-12} arcsec yr⁻¹.

Acknowledgements The author would like to thank C. Hohenkerk, the chair of the IAU SOFA Board for pointing out this error in the original publication.
