Correction to: Comput Geosci

<https://doi.org/10.1007/s10596-018-9768-y>

The original version of this article unfortunately contained mistakes introduced during the production process. The corrections are given in the following list:

(1) Figure 6 was missing. The figure is now given below:

Fig. 6 Voxel misclassifications within the textural contrast region

(2) The last sentence of the 5th paragraph under Section 3 should be rewritten as:

The relative capacity of the different segmentation to classify based on texture can be seen by examining the fraction of misclassified voxels within the textural contrast phase (Fig. 6).

The original article has been corrected.

The online version of the original article can be found at <https://doi.org/10.1007/s10596-018-9768-y>.
