Correction to:
Digestive Diseases and Sciences (2019) 64:1651–1659
<https://doi.org/10.1007/s10620-019-05570-1>

The original version of the article unfortunately contained a couple of errors. In ‘Methods’ section, ‘Outcomes’ subsection, the sentence ‘Endoscopic remission was defined as an SES-CD ≤ 2 in patients with CD and an EMS ≤ 2 in UC

patients while off corticosteroids.’ should read ‘Endoscopic remission was defined as an SES-CD ≤ 2 in patients with CD and an EMS ≤ 1 in UC patients while off corticosteroids.’

In Figure 1, legend of light blue coloured bars ‘In Endoscopic Remission at Week 52’ should be replaced with ‘Not in Endoscopic Remission at Week 52’. Corrected version of Fig. 1 is given below.

The original article can be found online at <https://doi.org/10.1007/s10620-019-05570-1>.
