Correction to: Environ Biol Fish (2021) 104(4):529–533
<https://doi.org/10.1007/s10641-021-01090-y>

The original published version of this article contained errors in the third paragraph (p. 530). Details on those errors and related corrections are provided here. One tagged eel released in St. 8 was mistakenly put into the data released in St. 7. The corrected text is:

Eight (ID28–35 [mean \pm standard deviation = 478 ± 57 mm total length (TL)]) and seven eels

(ID21–27 [475 ± 56 mm TL]), which were randomly selected, were released at lower (St. 7; Fig. 1c) and upper (St. 8; Fig. 1d) reaches of the weir on 8 April 2019, and were monitored until 15 July 2020.

Publisher's note Springer Nature remains neutral with regard to jurisdictional claims in published maps and institutional affiliations.
