At the end of another year in pandemia, I wish to express my sincere gratitude, also on behalf of the other editors, the members of the editorial board and the publisher of the European Journal of Epidemiology, to the referees of the articles considered for the 2021 volume of EJE. Hundreds of busy colleagues have spent their time in assessing close to 2000 manuscripts submitted to our Journal, in selecting the ones that may possibly be published, and in improving the quality of the selected articles. All manuscripts considered for publication in EJE are peer-reviewed, also research letters, letters to the editor, and other forms of correspondence. Many of the reviewers have helped us in the past years as well, and we are tremendously appreciative and grateful to them [1–3]. It is largely thanks to them that EJE is doing well in attracting and publishing valuable contributions on epidemiologic research findings and epidemiologic methods.
