<https://doi.org/10.1007/s10658-023-02717-9>

Original article was published with incorrect figure caption and needs to be correctly read as:

Fig. 1 Symptoms of downy mildew of cucurbits on different hosts in Brazil. a-b, *Cucumis sativus*. c-d, *Cucumis melo*. e-f, *Cucurbita moschata*. g-h, *Cucumis anguria*

Figure 2: Phylogenetic tree obtained by Bayesian Inference of the concatenated *cox2*, *cox2-1*, *cox1* and

ITS regions. Later probabilities are indicated above the nodes and symbols in front of the isolates indicate which are the respective hosts. The tree was rooted with the species *Pseudoperonospora humuli*

Original article has been updated.
