It has recently come to the authors' attention that a study was published in 2006 concerning water samples taken from Istanbul. While the articles are different, and the present article covers a much wider geographical basis, the authors recognize that the subtitle of their paper 'First results from Turkey' could be misinterpreted.

The study concerning Istanbul was published by Sehir Birteksöz, A, Zeybek, Z, and Çotuk, A, in the book chapter *In vitro activities of various antibiotics against Legionella pneumophila* published in the book entitled *Legionella: State Of The Art 30 Years After Its Recognition*, 2006, American Society for Microbiology, Washington, DC.
