This article [1] has been retracted at the request of the author. After publication, it was brought to the author's attention that the appropriate permissions to publish the data were not sought. Concerns were also raised that the findings reported in this study may be unreliable due to incorrect methods for data collection. The data collection methods have since been revised by the investigators. As the data owners (Ethiopian Space Science Technology Institution, Amhara National Regional State, Mekelle University, Bahir Dar University, Gondar University, and Woldia University) did not approve the disclosure of the information contained in the article, it has been retracted and removed from the journal.
