Change the following sentences in the Introduction: "The commonalities and differences between SRGCNNs and linear spatial regression models are further elaborated to help understand how each component in a traditional spatial regression analysis can be formalized in the new paradigm with baseline linear models the social media check-ins data at the urban points of interest (POIs) to describe how SRGCNNs can be adopted in the urban scenario, where irregular distributed spatial multivariate data needs modeling and prediction. Furthermore, we present an alternative way to enable geographically weighted regression in SRGCNNs and compare the results with baseline linear models." to "The commonalities and differences between SRGCNNs and linear spatial regression models are further elaborated to help understand how each component in a traditional spatialregression analysis can be formalized in the new paradigm."
