The unprovoked attack against Ukraine, a democratic and independent country, is a blatant violation of international law and of core values of humanity. The Russian invasion is an assault on the fundamental principles of freedom, democracy and self-determination, which provide the basis for academic freedom and opportunities for scientific exchange and cooperation. In this dark hour, our thoughts and deepest sympathy are with the people of Ukraine. The International Glycoconjugate Organization (IGO) stands in solidarity with the scientific community and the scientists in Ukraine. IGO acknowledges the Russian scientists and citizens who are ashamed of this attack and speak out against the war. IGO calls on the Russian leadership to immediately cease all military action against Ukraine and put an end to this war.
