Correction to: HEC Forum

<https://doi.org/10.1007/s10730-021-09440-0>

In the original publication, the sentence “Most notable and famous are the Tuskegee syphilis experiments that occurred from 1932–1972, in which Black men in Macon County, AL were infected with syphilis under the guise of free health care (Jones 1993).” under the section “**Drivers of Mistrust of Motives**” was published incorrectly. The correct one is “Most notable and famous are the Tuskegee syphilis experiments that occurred from 1932–1972, in which Black men in Macon County, AL, many of whom had latent syphilis, were misled into believing that they would receive free health care in exchange for their participation (Jones 1993).

The original article has been corrected.
