It has come to my attention that a number of formulations in the section “Disciplinary Landscape: Cytology and Genetics” (pp. 183–186) of my article “Method as a Function of Disciplinary Landscape: C.D. Darlington and the History of Cytology 1925–1950,” *Journal of the History of Biology*, 39 (1), 2006, pp. 165–197, do not provide due credit to a source. While Franz Schrader, “Three Quarter Centuries of Cytology,” *Science* 107 (1948): 155–159, is cited in the article, his reminiscences and analysis of the historical development of cytology provided a helpful historiographical context, as well as specific insights, for my article and should have been more fully acknowledged.

The original article can be found online at <https://doi.org/10.1007/s10739-004-2085-4>.
