After the publication of our article, we became aware that there were errors in Figs. 3 c and d; the figures were incorrectly presented. Our figures in Figs. 3 c and d are confused with another by the side research project. These errors do not affect the discussion or conclusions in the article. The correct versions of Figs. 3 c and d are shown.

We apologize to the journal and to the readers for these errors.

Fig. 3. NFAT5 deficiency impairs HUASMC migration and proliferation. **a** Biomechanical stretch-stimulated HUASMCs migration. **b** NFAT5-siRNA-treated HUASMCs migration. **c** The cells were stained with EdU and DAPI after transfection with the biomechanical stretch and NFAT5-siRNA treatment. **d** Cell cycle distribution of HUASMCs after biomechanical stretch and NFAT5-siRNA treatment. The results are shown as the means $\pm$ SD of at least three separate experiments. * $p < 0.05$.
