**Fig. 1** Block diagram of a 2SB mixer.

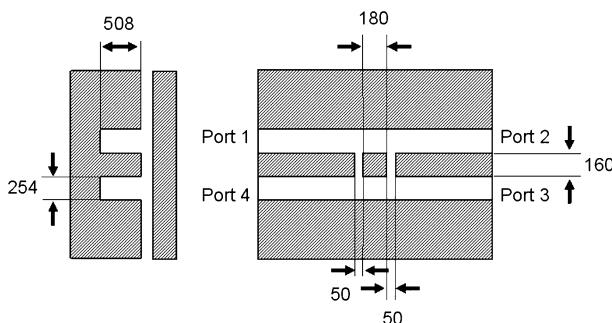

**Fig. 2** Diagram of the RF quadrature hybrid. Dimensions are in  $\mu\text{m}$ .

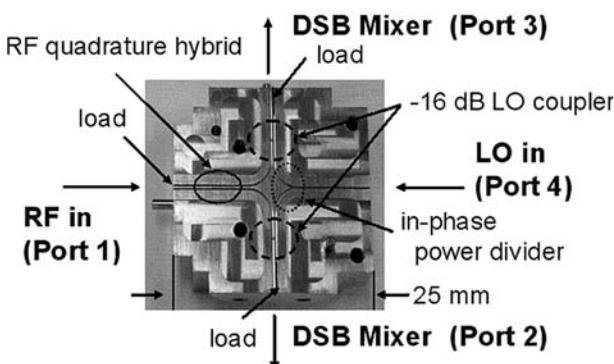

**Fig. 4** (a) Diagram of the in-phase power divider. This is an E-plane Y-junction. The waveguide size is  $508 \mu\text{m} \times 254 \mu\text{m}$ . (b) Simulated results of the input return loss of the in-phase power divider when the radius is varied from 1.5 mm to 3.0 mm.

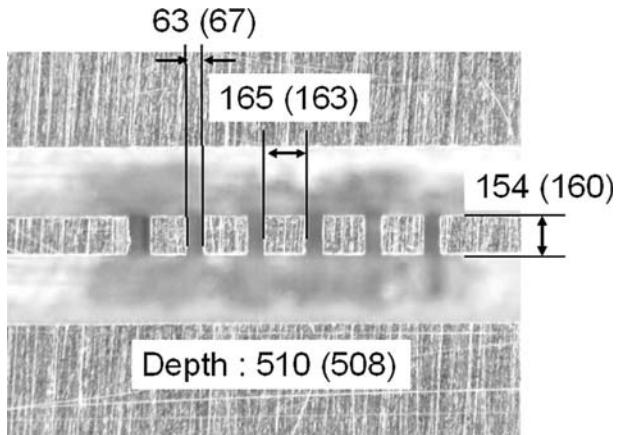

**Fig. 6** Diagram of the LO coupler. Dimensions are in  $\mu\text{m}$ .

**Fig. 8** Photograph of the RF/LO coupler.

**Fig. 9** Photograph of the RF quadrature hybrid. The RF quadrature hybrid is a 6 branch-line coupler. The dimensions are in  $\mu\text{m}$ . The values with and without the parentheses show the design and optically measured values, respectively.

**Fig. 11** Photograph of the LO coupler. This LO coupler is a 2-slot coupler. The dimensions are in  $\mu\text{m}$ . The values with and without the parentheses show the design and optically measured values, respectively.
