Retraction to: International Journal of Thermophysics (2019) 40:94 <https://doi.org/10.1007/s10765-019-2563-8>

The Editor-in-Chief has retracted this article. After publication, a reader raised, among others, the following concerns:

1. There is a term RD missing from the dimensional Eqs. 1–5, This term is also absent from the transformed Eqs. 6–10, while it appears suddenly in Eq. 14.
2. There is no explanation why the numerical results do not satisfy the correct boundary conditions ($\theta(\eta=0) = \varphi(\eta=0) = 1$).
3. The authors provided no comment regarding the insufficient truncation of the computational domain.

Post-publication peer-review found these errors to undermine the article. The Editor-in-Chief no longer has confidence in the reliability of the work presented. The authors do not agree to this retraction.
