The article “Longitudinal Associations Between Trauma Exposure and Executive Functions in Children: Findings from a Dutch Birth Cohort Study”, was originally published electronically on the publisher’s internet portal on 5 September 2022 with error on descriptive information found in ‘Study Population’ and ‘Childhood Trauma Exposure’ subsections.

Additionally, in Table 1, the number for exposure to one traumatic event at T1 should be 78 and not 785 as originally displayed in the paper.

The original article has been corrected.
