Correction to:
Journal of Autism and Developmental Disorders
<https://doi.org/10.1007/s10803-018-3504-2>

The original version of this article unfortunately contained a mistake. SSIS scores were mistakenly coded using student-report norms rather than parent-report norms. The corrected Table 3 and results are shown below.

Change from time 1 to time 2 and time 1 to time 3 on the SRS, SSIS Social Skills and Problem Behavior, TASSK, SIAS, and R-UCLA: Pillai's Trace = 0.94, $F(12, 54) = 3.99$, $p < .001$, $\eta_p^2 = .47$; Pillai's Trace = 0.87, $F(12, 54) = 3.44$, $p = .001$, $\eta_p^2 = .43$. Change from Time 1 to Time 2 in SSIS

Social Skills: $F(2, 31) = 4.47$, $p = .02$, $\eta_p^2 = .22$. PwP group and DTC group comparison: $p = .02$, $d = 1.19$. Change from Time 1 to Time 3 in SSIS Social Skills: $F(2, 31) = 6.70$, $p = .004$, $\eta_p^2 = .30$. Traditional PEERS group and DTC group comparison: $p = .07$, $d = 1.51$. PwP group and DTC group comparison: $p = .004$, $d = 1.34$. Change from Time 1 to Time 2 in SSIS Problem Behaviors: $F(2, 31) = 2.25$, $p = .12$, $\eta_p^2 = .13$ (This result was previously statistically significant). Change from Time 1 to Time 3 in SSIS Problem Behaviors: $F(2, 31) = 4.33$, $p = .02$, $\eta_p^2 = .22$. PwP group and DTC group comparison: $p = .02$, $d = 1.19$.
