Fig. 1 Practitioner IT implementation fidelity in closed triangles corresponding to left y-axis. Frequency of target communication opportunities provided in open circles and child target communication behavior in closed squares corresponding to the right y-axis. General-

ization probes in open triangles for practitioner implementation fidelity, closed circles for communication opportunities, and open squares for child behavior.

Fig. 2 Practitioner PRT implementation fidelity in closed triangles corresponding to left y-axis. Frequency of target communication opportunities provided in open circles and child target communication behavior in closed squares corresponding to the right y-axis.

Generalization probes in open triangles for practitioner implementation fidelity, closed circles for communication opportunities, and open squares for child behavior.
