Correction to: Journal for General Philosophy of Science

<https://doi.org/10.1007/s10838-020-09507-5>

The Editors of JGPS regret that the corrections to this article have made two formulations misleading for the reader:

1. In the original publication, the last sentence of the Introduction is: “Section 5 also indicates the width of practical applicability that a SD is achieved through the completion of this project.”. This sentence should be replaced by: “Section 5 also indicates the width of practical applicability that a SD achieved through the completion of this project would enjoy.”.
2. In the original publication, in Section 2.2, point 2 of the list of Kuhn’s selected group of “values” reads: “consistency—internal and external, the latter being compatible with other theories contemporaneously accepted;”. This should be replaced by: “consistency—internal and external, the latter being compatibility with other theories contemporaneously accepted;”.

Publisher’s Note Springer Nature remains neutral with regard to jurisdictional claims in published maps and institutional affiliations.

The original article can be found online at <https://doi.org/10.1007/s10838-020-09507-5>.
