Dear Colleagues,

We are in the last quarter of 2010. It is this time of the year that we try to publish as many accepted papers as possible, and start 2011 'clean'. Therefore, you will see in the last three issues of 2010 more papers. We owe this to you, as we try hard to reduce the review cycle – I keep repeating myself because I am not satisfied with the unavoidable delays we encounter.

It is also this time of the year that we look at the Editorial Board members, how many years they have served, and whether their term is completed. A new board, more enhanced will be in place soon.

As I write this editorial, there are more than 100 papers under review! The goal is to process as many as possible without reducing quality – I always say that. The journal is healthy, its reputation is better, and it will be even better in the near future, I promise.

Enjoy the issue.
