The authors of [1] wish to state explicitly that all of the data for the rutile thin films deposited on (001) oriented rutile substrates are for a single control sample and have been included in this article solely for the purpose of comparative assessment. All of the rutile data have been published in the preceding publications [2] and [3].

The original article can be found online at <https://doi.org/10.1007/s10853-020-04592-9>.
