The first sentence under the Results and Discussion section on page 378 is corrected as follows:

A search of the Cambridge Structural Database [16] shows 11 structurally characterized complexes of the

general form $LM(\mu-X)_2Li(solv)_2$, where L = N-N'-bis(2,6-diisopropylphenyl)pentane-2,4-diketiminato or 'nacnac', M = any metal, X = halide, and solv = either tetrahydrofuran or diethylether [4, 17–22].

In addition, reference 16 is updated as follows:

Allen FH (2002) Acta Cryst B58:380.
