Correction to: Journal of Family Violence <https://doi.org/10.1007/s10896-023-00515-9>

The originally published version of this article unfortunately contained one mistake. Under the Results Section, the sentence reading “Participants reported a wide range of years living in the United States, 1 year to 21 years, with an average of 16.88 years, and the majority (74%) of the participants reported some type of employment outside of the home,” was incorrect.

The sentence in the Results Section has now been corrected as follows:

“Participants reported a wide range of years living in the United States, 1 year to 21 years, with an average of 8.0 years, and the majority (74%) of the participants reported some type of employment outside of the home.”

The original article has been corrected.
