The full acknowledgments were inadvertently not included. The authors regret this oversight. Below are additional acknowledgements.

This paper is based upon the work of a MSc thesis, from the University of Plymouth, 2016. We are grateful for the assistance of Professor Andrew Wilkie who enabled recruitment via a substantial amendment to his existing study Craniofacial Malformations and provided support and con-

structive comments throughout. We are grateful to Dr. Deirdre Cilliers for her input with current prenatal practice in Oxford and for her support. We are grateful to Miss Helen Lord for her input and knowledge from the Molecular Genetics Laboratory, Oxford. We are also grateful to Mr. David Johnson and Mr. Steve Wall for permitting attendance to the Craniofacial clinic Oxford and for their support. We are particularly grateful to the individuals of the Oxford Craniofacial Unit who agreed to be interviewed and generously gave up their time to discuss their personal, and sometimes difficult, experiences with us. This research would not have been possible without their participation.
