Correction to: Journal of Scientific Computing
<https://doi.org/10.1007/s10915-019-01053-7>

The original version of this article unfortunately contained an error in Eq. 5. The term “ $v(0)$ ” was misplaced due to incorrect breaking. The correct Eq. 5 is given below:

$$\begin{aligned} v_t + \frac{1}{3}(D \otimes I_M)Av + \frac{1}{3}A(D \otimes I_M)v - \epsilon(D^2 \otimes I_M)v \\ = (P^{-1}E_0 \otimes I_M)\Sigma_0(L_0v - e_0 \otimes \tilde{g}_0) \\ + (P^{-1}E_N \otimes I_M)\Sigma_1(L_1v - e_{N_x} \otimes \tilde{g}_1) \\ v(0) = f \end{aligned} \quad (5)$$

The original article has been corrected.
