Correction to: J Supercond Nov Magn (2018) 31: 3545–3551
<https://doi.org/10.1007/s10948-018-4598-7>

Some corrections are needed in original article.

In Fig. 4 ρ vs T there is a mistake in vertical axis text label it should be $\rho \cdot 10^2 (\Omega \text{ cm})$ instead of $\rho (\Omega \text{ cm})$. This is a typing mistake and it shows the less magnitude of resistivity. There is no mistake in insets (a) and (b) of Fig. 4.

In caption of Fig. 3 (c) the hysteresis observed at $H = 0$ T instead of $H = T$

In caption of Fig. 4 measured temperature range mentioned is 5–750 K but it should be 77–750 K.

These corrections will not affect the discussions and conclusion.

The author apologizes for this inconvenience.

Fig. 4 Temperature dependent of electrical resistivity showing semiconducting behavior in the entire measured temperature range 77–750 K. Inset (a) shows the thermal activation model and inset (b) shows Mott's variable-range hopping model in the low temperature region

The online version of the original article can be found at <https://doi.org/10.1007/s10948-018-4598-7>
