Correction: Journal of Superconductivity and Novel Magnetism

<https://doi.org/10.1007/s10948-020-05717-6>

After this article was published online but before the special issue to which it belongs went to print, the article was updated to correct some minor mistakes, misspellings, typos, and inadvertent grammatical errors. The substantive errors consist of changing the “-“ sign in the last column of the second row in Table 1 to “+” and part of the sentence “...a combination of the...(which are representations of Q_1).” towards the end of Sect. 2.4 by “...a combination of those...which are irreducible representations of Q_1 .” [note the omission of brackets], replacing the “SRO” in the middle of the second paragraph of

Sect. 5 by “cuprates” as well as the “ A_1 ” towards the end of App. 1 with “ A_2 ”, and replacing the “zero temperature” towards the end of the third paragraph of Sect. 6 by “zero magnetic field”. These and all other changes that have been made do not affect the overall meaning of the paper. The authors wish to thank *the Journal of Superconductivity and Novel Magnetism* for their accommodation in making these late corrections possible.

The original article has been corrected.
