On page 1284, the second sentence of Sect. 2 should read: “The purity of B15C5 is > 0.99 mole fraction and it was determined with a TG DSC 111 (SETARAM) with indium as a standard.”

On page 1291, the next to last sentence should read: “Thus, one can assume that this is not due to experimental errors but it is connected with the process of hydrophobic hydration of the crown ether and PrOH by the water molecules in the range $x_w \geq 0.6$.”

The online version of the original article can be found under doi:[10.1007/s10953-009-9446-8](https://doi.org/10.1007/s10953-009-9446-8).
